

ASSIGNMENT 1

INSTRUCTIONS FOR THIS ASSIGNMENT:

- Create a NetBeans project and call it Assignment1_youradmno e.g. Assignment1_25697
- Define classes as required in the question below.
- When done locate your project folder on your computer i.e.
C:\Users\Kaari\Documents\NetBeansProjects
- Zip your project folder and upload the zipped project folder on the link provided in eLearning.

Consider Equity Bank's BankAccount classes as defined in the UML diagram below. Equity Bank also offers their customers additional account types:

- A CurrentAccount that charges a monthly maintenance fee on the balance
- Savings Account that earns a monthly interest to the balance
